

PENEX®

Soil Conditioner

PRODUCT INFORMATION

PENEX is a soil conditioner designed to aid in water penetration in soil, reduce water run-off and increase soil function. It can also stimulate microbial activities in the soil.

ACTIVE INGREDIENTS

Ammonium Laureth Sulfate.....	15.0%
Amino Acid.....	5.0%

DIRECTIONS OF USE:

SHAKE WELL BEFORE USING

Rate of Application:

The general recommended rate is 16 fl. oz. per acre. For heavy soils, two (2) applications of 16 fl. oz. per acre each is recommended.

Time of Application:

PENEX can be applied at any time. However, the preferred times are in the fall after harvest or in early spring before planting.

Method of Application:

Mix the recommended quantity of PENEX with enough water to cover the entire acre and apply to the soil. PENEX can also be applied through irrigation. Incorporation of PENEX is not necessary.

CONDITIONS OF SALE AND WARRANTY

The directions for use of this product reflect the opinion of experts based on field use and tests. The directions are believed to be reliable and should be followed carefully. Manufacturer warrants that this product conforms to the product description on the label and is reasonably fit for the purpose referred to in the Directions of Use.
