BUFFERMIN[®] 3-18-18

Liquid Fertilizer for Soil and Foliar Application

Buffermin 3-18-18 is a combination of urea, phosphoric acid and potassium hydroxide. It is a complete fertilizer and it is pH adjusted for optimum uptake and compatibility. **Buffermin 3-18-18** is a highly soluble, low salt index fertilizer. **Buffermin 3-18-18** can be applied to the soil as a starter fertilizer or mixed in a spray tank to be applied as a foliar application. **Buffermin 3-18-18** is compatible with most pesticides and can be applied by aircraft, ground rigs, and irrigation systems.

Benefits of Using Buffermin 3-18-18

- Low salt index
- Highly soluble
- Non-corrosive
- Non-phytotoxic when applied according to the directions
- Nutrients are quickly transported throughout the plant
- Can be applied to all food crops, ornamentals, and turf

Buffermin 3-18-18 is designed to be used as a supplement to a well balance fertilizer program. **Buffermin 3-18-18** is ideal for pre-plant and side dressing applications. It can be placed in the row before planting $\frac{1}{2}$ to 2 inches below the seed. Application rates are generally 2 to 8 gallons per acre depending on the crop and soil. For foliar applications, apply with a minimum of 10 gallons of water per acre.
