

# CHAMELEON™

Acidifier with 3-Step Color Change

## Product Information

**CHAMELEON** is an advance water conditioner and acidifier product designed to correct the pH of water before adding other products to the spray tank. As **CHAMELEON** is added to the spray tank the water color changes to indicate the pH range. This convenient color changing feature eliminates the need for pH meters and test strips.

### ACTIVE INGREDIENTS

Citric Acid .....66%

### OTHER INGREDIENT

Red cabbage extract.....34%

Total.....100%

**KEEP OUT OF REACH OF CHILDREN**

**SHAKE WELL BEFORE USE**

**CAUTION: CHAMELEON** is an acidic material and can cause eye and skin irritation. Always wear eye protection and gloves when mixing. In case of contact with eyes, flush immediately with water. Call a physician.

The product ingredients are exempt from registration with EPA under section 25(b) of Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA). **CHAMELEON** has not been registered with EPA. JH Biotech, Inc. represents that this product qualifies for exemption from registration under FIFRA.

**NET CONTENTS:** 2.5 gal. (9.45 l)

**Lot #:**

## Directions and General Recommendations

### WATER CONDITIONER

**CHAMELEON** is a water conditioner and acidifier with a built-in colored pH indicator. This indicator visually changes color either yellow, blue, or green depending on the pH of the water thus eliminating the need for pH test strips.

**TANK MIX SOLUTION:** Add water in the spray tank. Add **CHAMELEON** until the desired pH range is achieved as indicated by solution color:

Water pH is more than 7: Blue color  
Water pH is 6 - 7: Green color  
Water pH is less than 6: Yellow color

Estimated usage rates are listed in the table below.

Refer to pesticide labels for correct pH range (generally 5.5-6.5). If the solution in the tank is not used the same day, be sure to check the pH again and adjust if necessary. (Mixing Questions? Call Technical Support at 1-800-428-3493)

**CAUTION:** Always conduct a jar test and consult other product labels for compatibility prior to the use of Chameleon. **CHAMELEON** is an acid solution and therefore should not be used with products not compatible with acids. **CHAMELEON** is not compatible with calcium thiosulfate.

Original pH \ Desired pH	4.5	5.0	5.5	6.0	6.5	7.0
9.0	180	130	110	80	60	30
8.5	120	115	90	70	50	25
8.0	110	100	80	50	40	15
7.5	100	80	70	40	30	5
7.0	90	60	60	30	20	0

Fluid ounces of CHAMELEON needed in 100 gallons of water\*

\* This table can be used for reference only because the chemical composition of water can vary by location.
