ENDURANCE™ 20-3-3

Endurance 20-3-3 is a general purpose liquid turf fertilizer solution made from the highest quality N-P-K sources. Both the phosphorus and potassium are water soluble and are derived from non-chloride sources. **Endurance 20-3-3** will not clog or cause abrasion to equipment and is compatible with fungicides, herbicides, and insecticides and can be mixed and sprayed in one application to save time and labor. No special agitation is needed. **Endurance 20-3-3** is pH neutral and non-corrosive.

BENEFITS OF USING ENDURANCE 20-3-3

- Neutral pH
- Liquid formulation
- Non-corrosive
- No chlorides
- Broad compatibility

Endurance 20-3-3 is a true liquid solution that is easily applied with standard spray equipment. It is recommended for all types of grasses including: Bermuda, Bent and other cool season grasses, and St. Augustine and other warm season grasses.

GENERAL RECOMMENDATIONS

Always perform a jar test before mixing with other products in your tank.

TURF APPLICATIONS: Endurance 20-3-3 can be applied from early spring throughout the growing season on warm, transitional and cool season grasses. Apply ¼ lb. N to 1 lb. N per 1,000 square feet. Dilute with water according to desired nitrogen rate.

TEES AND GREENS: Apply Endurance 20-3-3 on tees and greens at desired rate with a spray unit applying no less than 1 gallon per 1,000 square feet. Apply every 10-14 days.
