

# JH Biotech, Inc. Bio-Activate Biostimulant

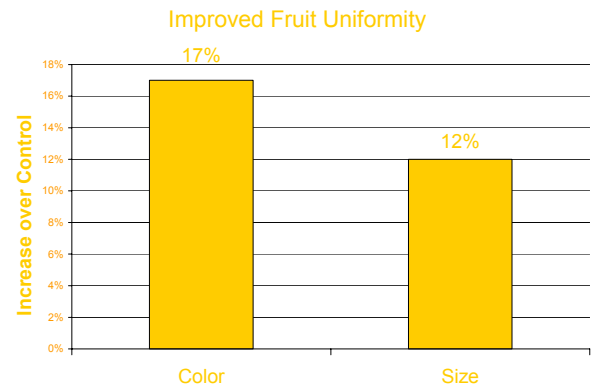

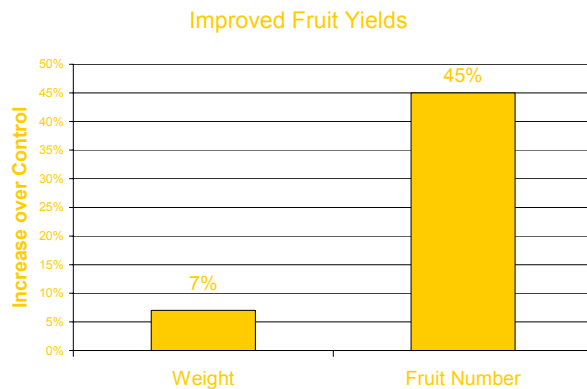

## Bio-Activate on Navel Oranges

### Objective:

This experiment was designed to determine the affect of JH Biotech’s Bio-Activate on Navel Oranges.

**Test Crop:** Navel Oranges  
**Location:** Orange Grove, CA  
**Date:** 1993  
**Treatment:** Control: Standard Crop Management Program  
Treatment: 5 Foliar Applications

### Results:

### Conclusion:

The addition of JH Biotech’s Bio-Activate Biostimulant to an effective crop management program increased the weight, numerical count, color uniformity and size uniformity. Bio-Activate helps to more than double the yield of fruit in the most profitable “oversized” category. There was also a 15% reduction in the amount of damage caused by thrip.
