

2006 IR-4 on Pumpkin phytophthora.

MTM06-4 Control of Phytophthora Blight with Biopesticides Applied Through the Dr Conventionally Through Foliar Applications, IR-4 Demonstration/Advanced Project

Margaret Tuttle McGrath and Jane F. Davey, LIHREC, Cornell University

Foliar treatments were applied with a tractor-mounted boom sprayer operated at 120 psi and 85 gal/in. apart). Drip applications were applied through two strips of Aquatraxx™ drip tape with a 12-in. gal/min. The injection period for each drip application was 45 minutes.

Fungicide Application Dates: Foliar applications = 7/26, 8/9, 8/23, 9/7, 9/21 Drip applications = 8/2 'Munchkin' pumpkin (mini fruit type) transplanted 6/29 and 7/1. Seedlings for ProPhyte and Fospri inoculation dates: 8/18, 9/5, 9/21
